**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 7, and 12-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Rhyner (ch 665109 A5).

Rhyner (ch 665109 A5) discloses a cutting board having a base board (1), a sloping trough (7) with a concave arch (fig.3 and fig.6) that decreases in depth as the slide extends from the edge of an interior point (fig.6 and fig.1).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-6 and 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rhyner (ch 665109 A5) in view of Gibson (5527022).

a. Rhyner discloses the claimed invention except for a texture and/or pebbled cutting surface with a trough surfaces being different in texture from the cutting surface.

b. Gibson discloses a cutting board having a cutting surface (36) with a texture and/or pebbled and a trough (28) surfaces being different in texture from the cutting surface which is an alternative configuration for processing food.

c. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Rhyner device by providing a cutting surface with a texture and/or pebbled and a trough surfaces being different in texture from the cutting surface as taught by Gibson which is an alternative configuration for processing food.

#### ***Response to Arguments***

**5. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.**

d. This application was withdrawn from issue because a new reference was found by the SPE as part the second pair eyes. Applicant should respond to the new art and rejection now of record.
